Information for hydraulic specialists

## Trailer unit

MPP858001

### Technical information:

Application	: Dump truck
Pressure	: 180 bar
Tank size	: 8 litre
Voltage	: 12 Volt DC
Motor	: 2.1 kW
Weight	: 11.5 kg

These power units are specially developed for dump truck applications. Combined with a single acting hydraulic cylinder a perfect solution for dumper lifting. The unit is completely assembled and electrically wired with an AMP super seal connector. The 2-way hydraulic valve will hold the load in position and allows easy electric lowering. The units are supplied with CE-marking.

### Spare parts:

- Control set COB851001
- For DC voltage only

This control set is for use with single acting applications. To be used in combination with the trailer set, including holster for bulkhead mounting. The magnets in the set are standard and intended for your convenience during use. The set is completely wired with 4 mtr. of cable and APM super seal connector.
